UGRAN

---

Made in UKRAINE

Group of companies

# UGRAN

---

Plant to produce products from granite, gabbro, and labradorite deposits in Ukraine.

We work with Businesses focusing on your values.

**Mission:**

---

Make your business profitable through our business processes.

**Primary value:**

---

The company's principal value is the trust of our customers.

**Principles:**

Compliance with the terms of delivery and quality of products is the value of partnership for many years. We fulfill our obligations 100%. We work according to the "Lean Production System."

# UGRAN BLACK WIN

**Product:**  
**Polished**  
**Gabbro**  
**Model DW1**

Products:  
tile, curb,  
paving stone, slab

Density:  
2900–3100 kg/m<sup>3</sup>

Frost resistance:  
≈ 300 cycles

Water absorption:  
0.05–0.17%

---

Perfect for facade work,  
it has a black color and  
white dots. Over large  
areas, the stone appears  
monotonously black.

Products:  
tile, curb,  
paving stone, slab

Density:  
2900–3100 kg/m<sup>3</sup>

Frost resistance:  
≈ 300 cycles

Water absorption:  
0.05–0.17%

---

One of the premium models - is suitable for facade work. The texture of the stone is slightly rough, textured, matte, and has a deep dark gray color.

# UGRAN BLACK WIN

**Product:  
Water-jet  
Gabbro  
Model EW1**

# UGRAN BLACK WIN

**Product:  
Flamed +  
Water-jet  
Gabbro  
Model SW1**

Products:  
tile, curb,  
paving stone, slab

Density:  
2900–3100 kg/m<sup>3</sup>

Frost resistance:  
≈ 300 cycles

Water absorption:  
0.05–0.17%

---

Premium Model - this processing method reveals the texture of the stone to the maximum. Suitable for both facade work and landscaping. The uniqueness of the processing allows you to get a deep dark gray color of the stone surface.

# UGRAN BLACK WIN

Products:  
tile, curb,  
paving stone, slab

Density:  
2900–3100 kg/m<sup>3</sup>

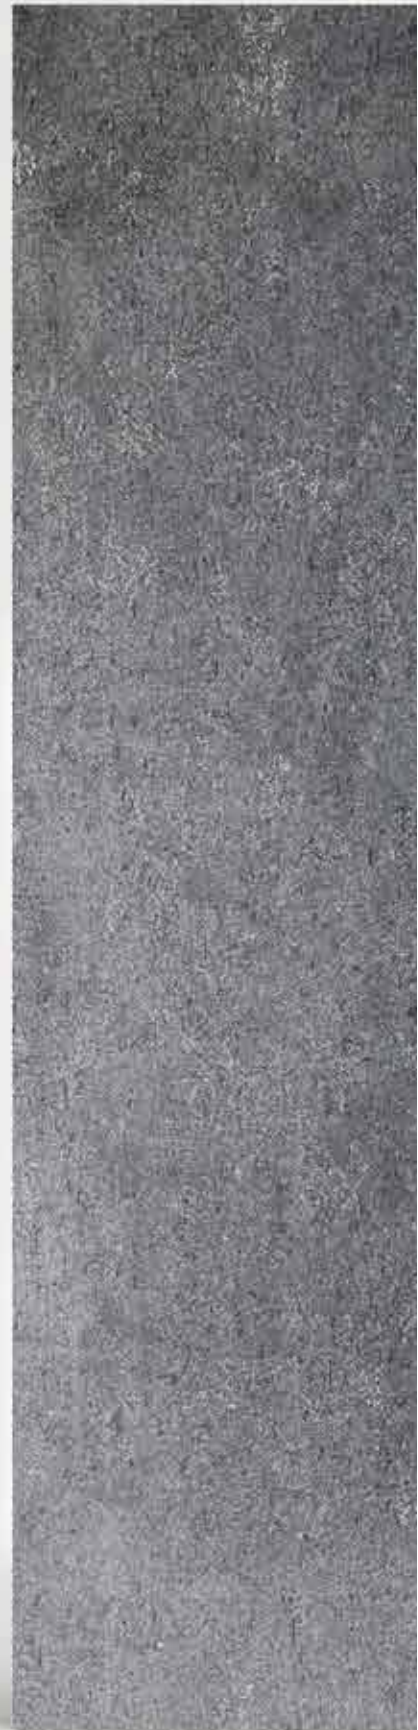

Frost resistance:  
≈ 300 cycles

Water absorption:  
0.05–0.17%

**Product:**  
**Grinding**  
**Gabbro**  
**Model EW2**

---

The advantage of the UGRAN Gabbro Black Win model is the processing, which reveals the natural beauty of the stone. Each Model E subclass can be unique and exclusive.

# UGRAN BLACK WIN

**Product:**  
**Brushed**  
**Gabbro**  
**Model SW2**

Products:  
tile, curb,  
paving stone, slab

Density:  
2900–3100 kg/m<sup>3</sup>

Frost resistance:  
≈ 300 cycles

Water absorption:  
0.05–0.17%

---

Premium model. Suitable for exterior and interior works. This model adds sophistication, antiquity, and exclusivity to your project.

# UGRAN BLACK WIN

Products:  
tile, curb,  
paving stone, slab

Density:  
2900–3100 kg/m<sup>3</sup>

Frost resistance:  
≈ 300 cycles

Water absorption:  
0.05–0.17%

**Product:  
Flamed  
Gabbro  
Model DW2**

---

In modern architecture, this model is used for facades. The model is ideal for paving and improvement of streets and park areas. The surface is rough, which provides an anti-slip effect in rainy and snowy weather.

# UGRAN BLACK WIN

**Product:**  
**Bush-**  
**hammered**  
**Gabbro**  
**Model EW3**

Products:  
tile, curb,  
paving stone, slab

Density:  
2900–3100 kg/m<sup>3</sup>

Frost resistance:  
≈ 300 cycles

Water absorption:  
0.05–0.17%

---

Antique stone with anti-slip structure. Ideal for landscaping and facades. The advantage of processing is the production of tiles with a thickness of 2 cm.

# UGRAN VOLGA BLUE FREEDOM

Products:  
tile, curb,  
paving stone, slab

Density:  
2740-2840 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.08–0.39%

**Product:**  
**Polished**  
**Labradorite**  
**Model EF1**

---

Ideal for facades and  
interior solutions. Steel  
iridescence and black  
color make the product  
premium.

# UGRAN VOLGA BLUE CLASSIC

**Product:  
Polished  
Labradorite  
Model DC1**

Products:  
tile, curb,  
paving stone, slab

Density:  
2700–2900 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0,03-0,16%

---

The most popular model for interior and exterior solutions. The black color with green inclusions and blue irisation.

Products:  
tile, curb,  
paving stone, slab

Density:  
2790–2870 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.05–0.12%

---

Dark stone with  
fine-grained iridescence.  
The blockiness of the  
stone makes it possible to  
produce large format tiles.

# UGRAN VOLGA BLUE SPACE

**Product:**  
**Polished**  
**Labradorite**  
**Model ES1**

# UGRAN VOLGA BLUE SELECT

**Product:  
Polished  
Labradorite  
Model SS**

Products:  
tile, curb,  
paving stone, slab

Density:  
2820-2840 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.12–0.13%

---

Premium stone of extra class. The black color with pronounced blue irisation. Often used for interior solutions.

# UGRAN VOLGA BLUE BENEFIT

Products:  
tile, curb,  
paving stone, slab

Density:  
2750-2840 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.08–0.21%

**Product:**  
**Polished**  
**Labradorite**  
**Model SBI**

---

The bluest and most expensive Labradorite. A rare stone goes only to the winners. Description unnecessary because this stone really decorate your project.

# UGRAN VOLGA BLUE

**Product:**  
**Flamed**  
**Labradorite**  
**Model DC2**

Products:  
tile, curb,  
paving stone, slab

Density:  
2700–2900 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.08–0.39%

---

One of the premium models - this processing method reveals the texture of the stone to the maximum and makes it possible to obtain a black color with an anti-slip effect. Suitable for both facade work and landscaping.

# UGRAN VOLGA BLUE

Products:  
tile, curb,  
paving stone, slab

Density:  
2800–3000 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.08–0.39%

**Product:**  
**Water-jet**  
**Labradorite**  
**Model SS1**

---

The stone in this treatment looks premium and will help you realize large volumes. You will not only protect the project, but you will also receive significant benefits and emphasize the status of any object.

# UGRAN VOLGA BLUE

**Product:**  
**Bush-**  
**hammered**  
**Labradorite**  
**Model EC1**

Products:  
tile, curb,  
paving stone, slab

Density:  
2800–3000 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.08–0.39%

---

Antique look, gray color with railings. The blockiness of the stone allows the production of large-format slabs. The unique structure and color make it possible to embody the most complex interior and exterior solutions.

# UGRAN GREY UKRAINE EXTRA

Products:  
tile, curb,  
paving stone, slab

Density:  
2730–2750 kg/m<sup>3</sup>

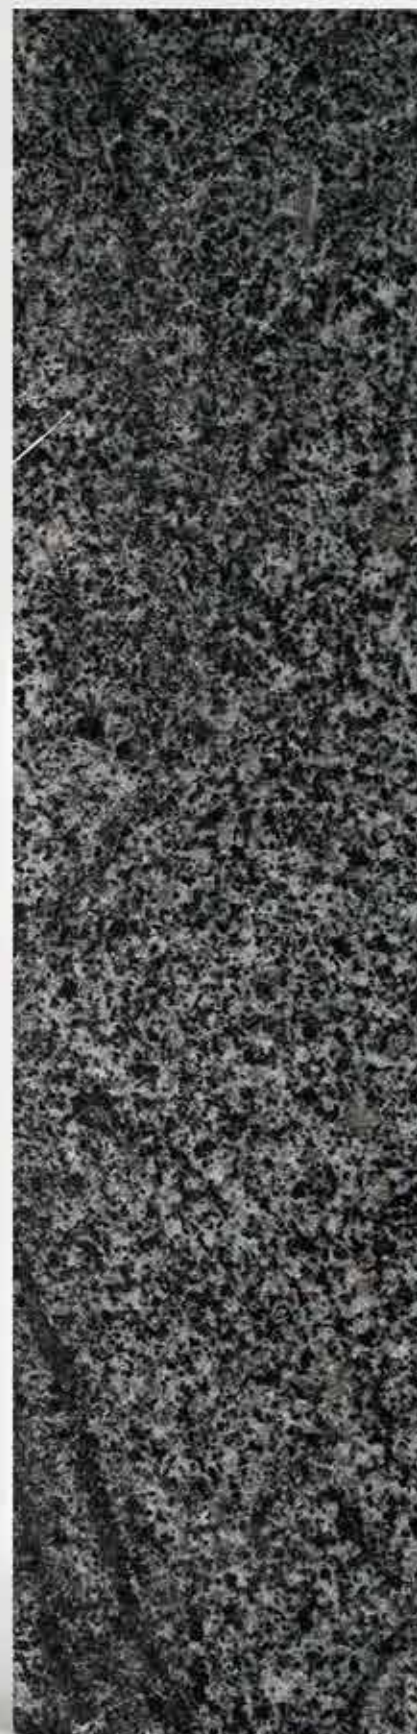

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.24–0.25%

**Product:**  
**Polished**  
**Granite**  
**Model DP1**

---

The combination of the white and black color of the stone allows you to get a unique gray tint on the surface. Thus, the Model DP1 emphasizes the refined nobility of style when used on building facades.

# UGRAN GREY UKRAINE EXTRA

**Product:  
Flamed  
Granite  
Model DP2**

Products:  
tile, curb,  
paving stone, slab

Density:  
2730–2750 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.24–0.25%

---

Model DP2 is a versatile product that allows you to manufacture products without restrictions. The stone is light gray and has a rough surface. The Model DP2 is ideal for façade and paving applications.

# UGRAN ROSSA SANTIAGO EXTRA

Products:  
tile, curb,  
paving stone, slab

Density:  
2700–2800 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.20–0.25%

**Product:**  
**Polished**  
**Granite**  
**Model DR1**

---

Model DR1 will allow you to  
make the facade of your  
object bright and unique.  
The blocking of UGRAN  
ROSSA SANTIAGO EXTRA  
enables the production of  
large-sized tiles.

# UGRAN ROSSA SANTIAGO EXTRA

**Product:  
Flamed  
Granite  
Model DR2**

Products:  
tile, curb,  
paving stone, slab

Density:  
2700–2800 kg/m<sup>3</sup>

Frost resistance:  
≈ 150 cycles

Water absorption:  
0.20–0.25%

---

Model DR2 is a uniquely beautiful stone of intense red color. Model DR2 has an anti-slip surface and is used in landscaping. The blockiness of the stone makes it possible to produce large-sized tiles.

# CULTURE OF CO-OPERATION UGRAN

The ideology of UGRAN is to accept the values of the Partner's business and the Partner's trust as much as possible. We have decided on our mission - matter in the interests of Business Partners:

**stone processing companies,  
large wholesale companies, large  
construction companies,  
architectural agencies, and bureaus.**

We do not sell our products to DIY customers. We protect the projects of our partners of the agreed outcome. UGRAN has been operating in the stone processing market for over 12 years. UGRAN works with Businesses that share our values and principles.

# BENEFITS OF WORKING WITH UGRAN

1. Focus on black and dark gray stone - we understand it better than anyone.

2. We have our conveyor-type production. The introduction of the "Lean Production system" ensures low cost of products and high quality of goods.

3. We specialize in project manufacturing and have direct access to raw materials. When ordering cut-to-size products, you do not pay additional funds for sawing blanks - we immediately produce the required size.

4. Practice has shown that any processing operations, including shaping, are much cheaper in Ukraine than in most well-known processing countries. Thus, UGRAN will soon become one of the leading companies in Europe and globally, offering quality products at a favorable price.

5. We work only with the B2B segment of the market, forming the cost of our product in such a way that your business earns. DIY-buyers are not included in the orbit of our interests. It makes it possible to sell high-quality UGRAN products without a conflict of interest for our partners.

6. UGRAN has a significant logistical advantage. Firstly, vehicles reach the EU countries in 2-4 days, which allows us to ensure fast delivery times. Secondly, car delivery from Ukraine is cheaper than container transportation from other countries.

7. The US and EU countries have a zero rate of customs duty on goods from Ukraine. It makes the cost of our product even more profitable compared to deliveries from Asian countries.

8. We only work with high volumes: our shipment experience is more than 500 machines per year. It speaks of our ability to work really according to the standards of big business.

9. We provide customers with samples of our product. Given the diversity of black stone and the variety of treatments, the UGRAN partner will be able to protect the delivery project by agreeing on our product.

10. Our goal is to build the largest Ukrainian company in the world market that has been able to succeed. We are maximally motivated and flexible in terms of conditions for each of our clients.
